### Functions

**Tilting mechanism**            Version LX662-100

**Seat heights**                    +2cm

### Comments

**Deviating stitching**            When opting for different stitching colours, this option applies to the entire piece of furniture. If the inside and outside are selected with two different deviating stitching colours, this must be explicitly stated on the order. Deviating stitching is not possible on the decorative stitch Artisan, it always is the colour of the stitching for the outside.

**Certifications**                    All sheet materials used in this model comply with the CARB2 requirement or are NAF certified

On request foam materials with additional flame retardants can be applied.
