

# Onde

Designer

Perrine Vigneron

The aesthetic take on an acoustic panel without compromising on sound dampening qualities. The panel is pressed from PET Felt and its design allows free placement and overlapping to create a unique composition.

## Acoustic & Aesthetic

The Onde is an acoustic system made out of pressed PET-Felt, which is made of recycled PET bottles which are turned into a soft, though strong Felt material. This PET Felt is long lasting, UV stabilized and above all has a great acoustic performance.

The Onde floats in front of the wall or below the ceiling. Because of this, sound waves aren't only absorbed by the material, but also gets caught in between and behind the panels.

Because of its organic round shape, you can create the composition you desire, and by that adapt the Onde to every room and space. The Onde is easily to attach by a smart magnetic system.

## Measurements

Weight Onde – 1,3 kg

---

Packed per 10 Ondes

---

Maximum of 10 Ondes per box

---

Package weight depends on the amount of Ondes

---

Package size  
82,5 x 74,5 x 26 cm; 0,16 m<sup>3</sup>

---

## Test results acoustic performance

Made out of PET Felt

---

Acoustic performance

---

Recycled and recyclable

---

Easy magnetic fixation

---

Design your own configurations

# DeVorm

## We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

## We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

## We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
