

Upside Down Island

Designer

De Vorm

The Upside Down Island holds a rotatable armrest. The upper side is soft and can be used as head support. When the armrest is turned upside down an upholstered table appears.

Reversible armrest – Table side

Reversible armrest – Soft side

Modular

A variety of upholstery options

Reversible armrest

DeVorm

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
