

It is the automotive sector that inspired the new interesting stool launched by lapalma at the Milan Furniture Fair 2016. The WIL stool, designed by Romano Marcato, has a main feature: an original three legged base of powder-coated metal or mat chromed metal. The particular tube of the legs has a circular cross-section, clearly visible where the feet are inserted, that becomes triangular towards the seat, providing better support to that in the junction with the pivot, thus underlining the original touch of the stool. The swiveling seat, which is very comfortable due to its polyurethane foam, can be upholstered with fabric, soft-leather or fake-leather, according to one's wish. 3 stitches highlight the broad, comfortable seating surface of WIL, which reminds of a steering wheel.

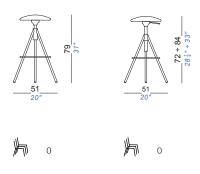

Stool with swivel seat upholstered in fabric, leather or eco-leather. Three metal legs with tubular structure at feet converting to triangular section at the point where it joins the seat. Base powder coated or mat chromed. Available also height adjustable only for the powder coated version.

consult the porfolio for the range of colors, fabrics, eco-leather, soft-leather.

use and maintenance instructions

Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spilt on the product must be wiped up immediately. When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base). Our company relieves from any responsibility in case of damage caused to fragile floors. Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Avoid any movements that could compromise the proper functionality of the product or the safety of the users. Wood and leather, being natural materials, could be easily damaged. Small impurities or imperfections are within quality standard range. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 40°C. Also products for outdoor use could be afflicted by atmospheric agents. The product could undergo possible exterior changes due to particular exposure to heat, humidity and saltiness. An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Maintenance has to be carried out by experienced staff. Dispose of the package only after assembling the product, in order to avoid the loss of ironmongery and components. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
